a new business model: ONE EUROPEAN COLLECTION

- One European Collection of scientific assets
- Common Collections development strategy
- Economies of scope and scale
- Monitoring impact of collections
(documenting ROI)
- Specialisation strategies
(e.g. in alignment with national priorities, e.g. Smart Specialisation Strategies)
- Joint Research Agendas

Current model

Slow
Expensive
Inefficient
limited

Example of current mode of operandi
25,000 researchers travel every year to physically access scientific collections and **800k objects** are packed and shipped (at an annual public cost of more than €70M)

Integrated RI model

Wide access
Lower costs
Faster
New insights
Optimised
FAIR data

The *first mass scale initiative to re-unite and serve* genomic, chemical, geographical, morphological and taxonomic information and link it to collections objects
