Thompson Institute for EARTH SYSTEMS

The Gift: two components

Phase 1: Enhance communication, outreach, and curriculum development about Earth Systems research - \$5.5M

Phase 2: Enhance physical infrastructure to highlight dynamic research and increase public engagement - \$37.5M

“The research carried out at the University of Florida is critical to our understanding of Earth’s systems. We believe it is essential that our university step forward to continue research on problems such as biodiversity and environmental conservation.”

— Beverly and Jon Thompson
