

Paleobiology Database

Documenting all of the fossil occurrences on the planet.

- We are georeferencing global fossil collection localities.
- We have 150,000 collections entered, but it is difficult to estimate the total number to be entered. Tens of millions?
- I will train new users of the Paleobiology Database, as well as my undergraduate students to use georeferencing.
- PaleoDB uses a distributed, Wiki-style model for data entry. Researchers and students around the world enter data for projects simultaneously.
