

# Workshop Highlights and Next Steps

- **Develop core goals for taxonomy synthesis:**
  - Generate target taxon lists
    - Process for resource gathering (spreadsheets, online resources)
    - Target lists for TPT - digitization (e.g. North American focus)
  - Work with postdoc to develop formatted/standardized taxonomy for NA parasites and hosts based on TPT data provider resources
- **Take Home from interaction workshop:**
  - Leave the interpretations for now - current goal is capture the interaction information with minimal interpretation from digitizers.
  - We will put together vocab and recommendations based our discussion, ask for input, and then provide a resource for the community.
  - We will organize a 'check in' on data capture and go over vocab for interpretations wihtin 2 months

# Workshop Highlights and Next Steps

- **Update on Georeferencing working group**
- **Broader Impacts/BLUE -**
  - team of people interested in learning more/developing modules
  - 1st meeting 1 month from now to determine interests and brain storm modules/disseminate information
- **RAB - take home**
  - Many questions to work through on data sharing and attribution - we are available for those discussions will discuss and make recommendations
  - Will send out a call for research project ideas
