

# Preliminary Results on Survey about Reuse of Species Occurrence Data and Use of Web-based Information Systems by Professionals

Elizabeth Martín  
Doctoral Student

School of Natural Resources and Environment  
University of Florida

# Doctoral Research

## Primary Goals

- Increase understanding on use of Web-based species occurrence information systems by academic and non-academic professionals
- Gather baseline data for future evaluations and comparisons

## Online survey of professionals

- Reuse of species occurrence data
- Use of Web-based information systems that provide species occurrence data

Research co-advisors: Larry Page & Shari Ellis

# Online Survey Methods

Identified organizations' websites & staff emails

## Academic institutions

- Universities
  - Classified as 'Highest Research Activity' \*

Departments searched:

- Biological, Ecological Sciences
- Earth, Ocean, Environmental Sciences

## Non-academic organizations

- State & Federal Agencies
    - 50 states
- Agencies/programs searched:
- Natural resource management & research
  - Environmental quality & protection
  - Agriculture (invasive species, pests)

\* 2015 Carnegie Classification of Institutions of Higher Education

# Online Survey Administration & Response

- UF Qualtrics
  - closed & open-ended questions
  - 10 - 20 minutes to complete
- 7,092 email invitations sent:
  - Academia - 3,143 emails
  - Non-Academia - 4,150 emails
- Survey was open
  - March 21 - April 25, 2017

## Response

942 usable survey responses

Response Rate = 15%

Completion Rate = 95%

# Respondents Sector of Work

## Original Sector of Work

N = 941

Summarized as:

- Academia (35%)
- Non-Academia (65%)

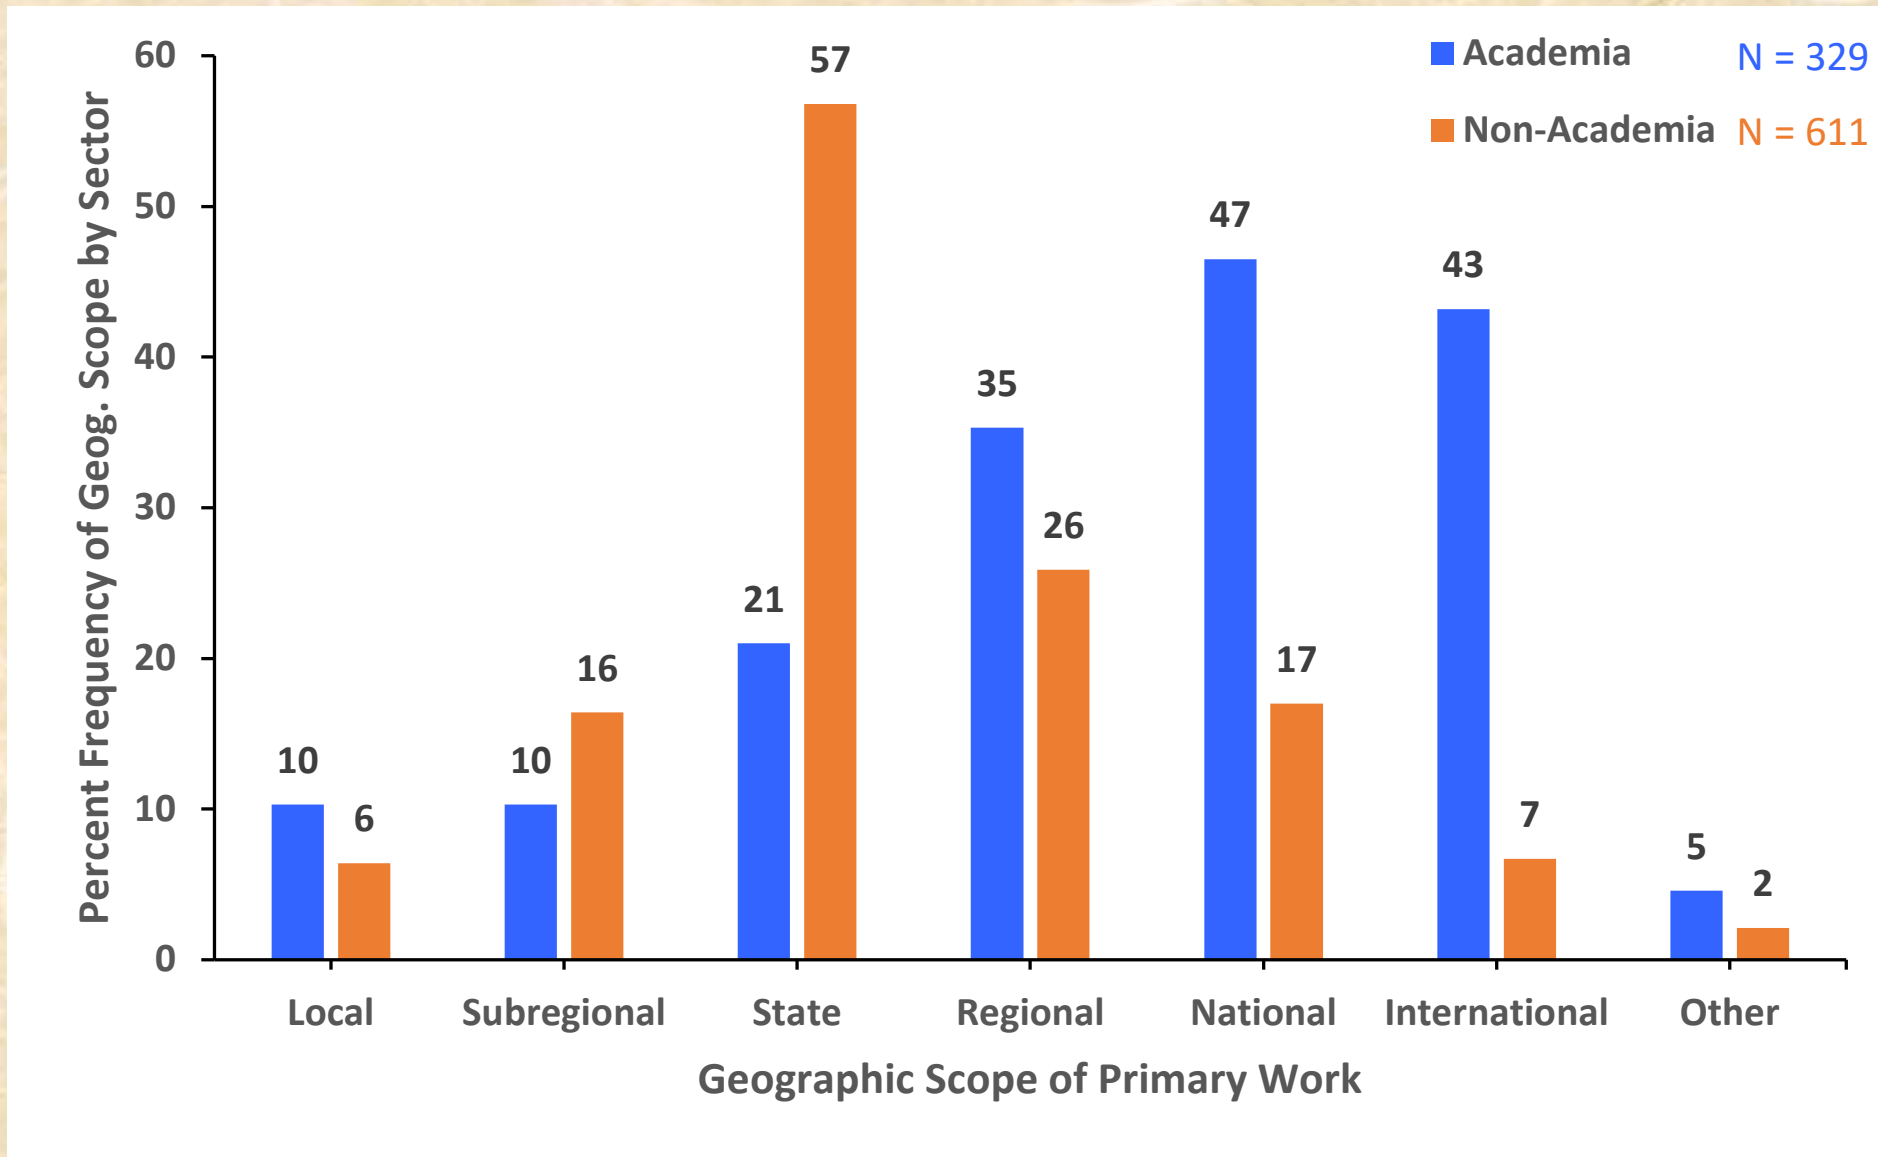

# Primary Area of Work of Respondents

Primary Area of Work	Academia Frequency (%)	Non-Academia Frequency (%)
Scientific research	283 (86%)	121 (20%)
Teaching	36 (11%)	10 (1%)
Natural resource management, conservation, and restoration practice	4 (1%)	386 (63%)
Environmental planning & review	1 (0.5%)	34 (6%)
Policy, law, administration	1 (0.5%)	29 (5%)
Technical / scientific information transfer & communications	4 (1%)	32 (5%)
Sample size (N)	329	612

Academia ≈ work primarily on scientific research activities (86%)

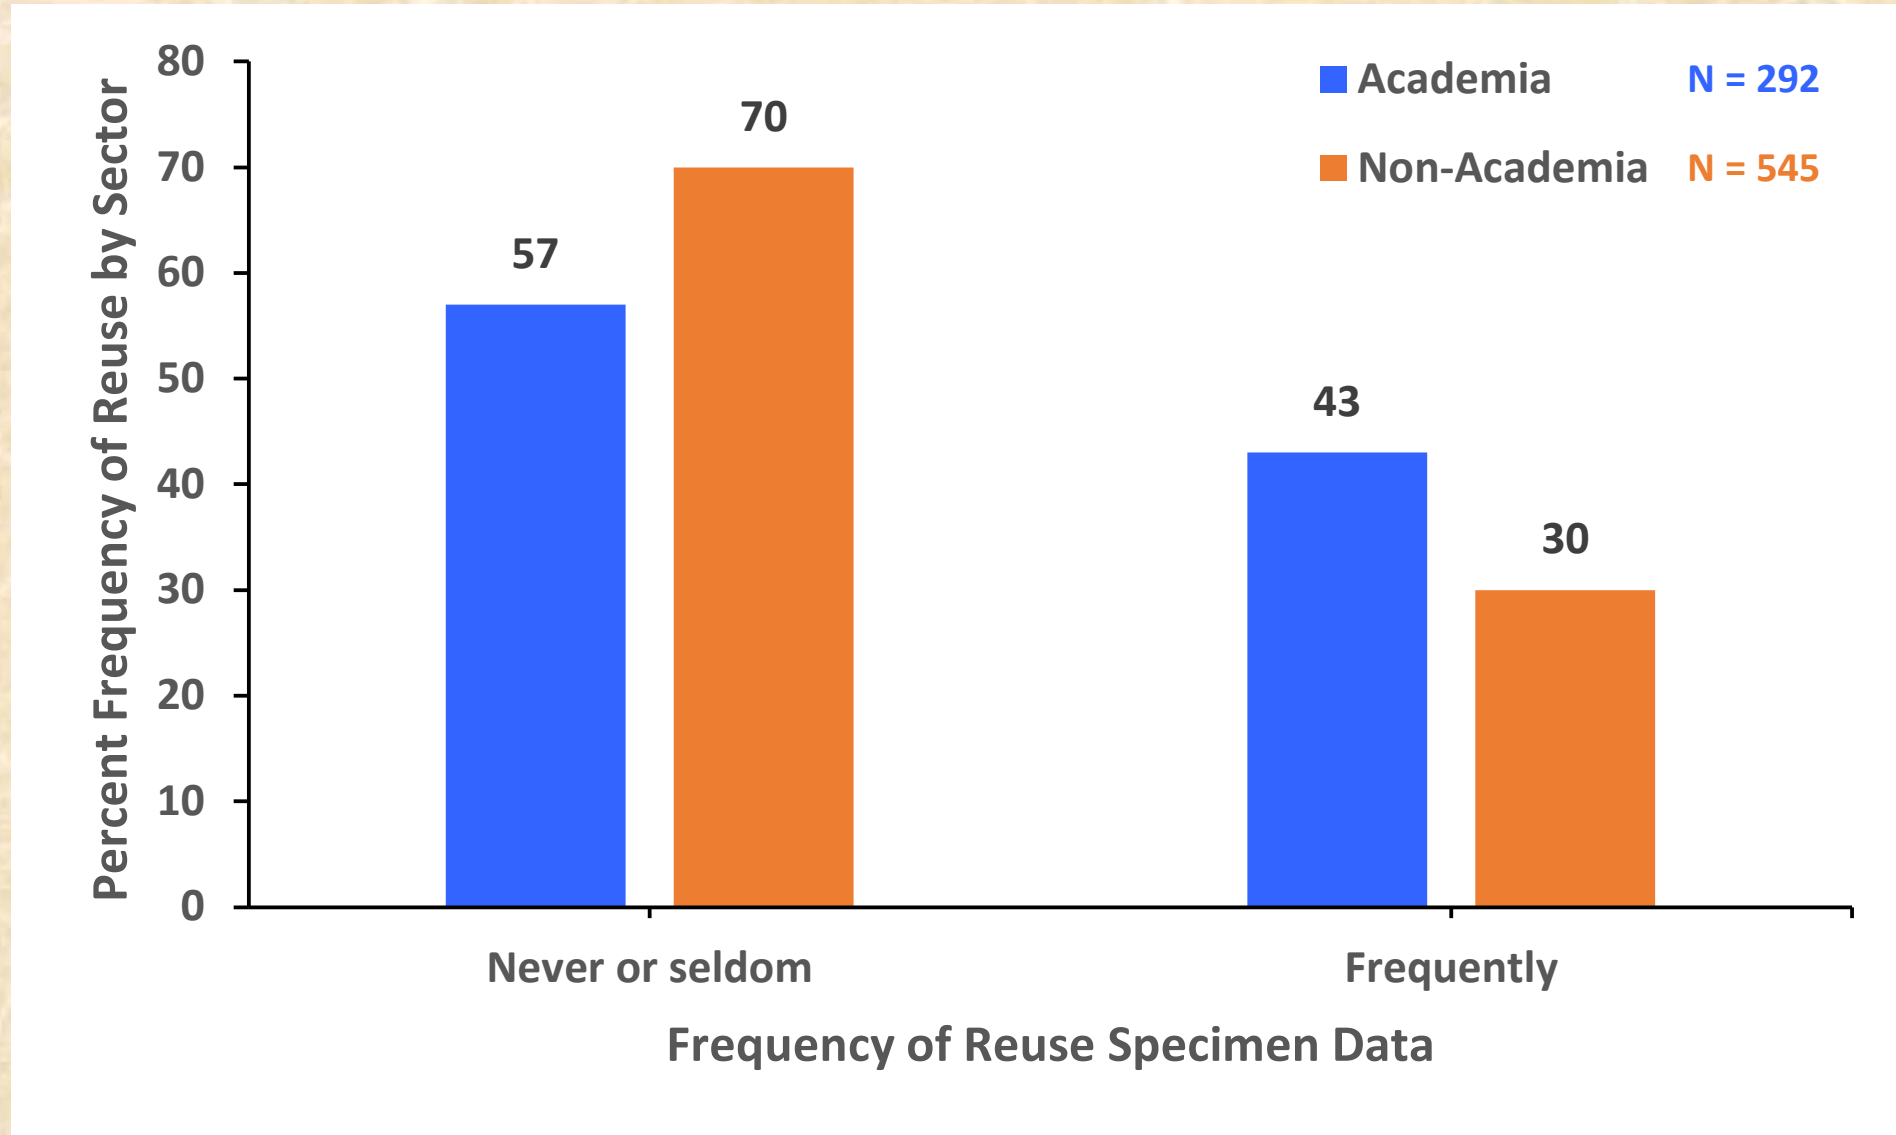

Non-Academia ≈ work primarily on natural resource & environment activities (79%)

# Geographic Scope of Respondent's Primary Work

From 'Select All that Apply' question. Total percentages by sector are greater than 100%.

# Reuse of Specimen Data

# Reuse of Observational Data

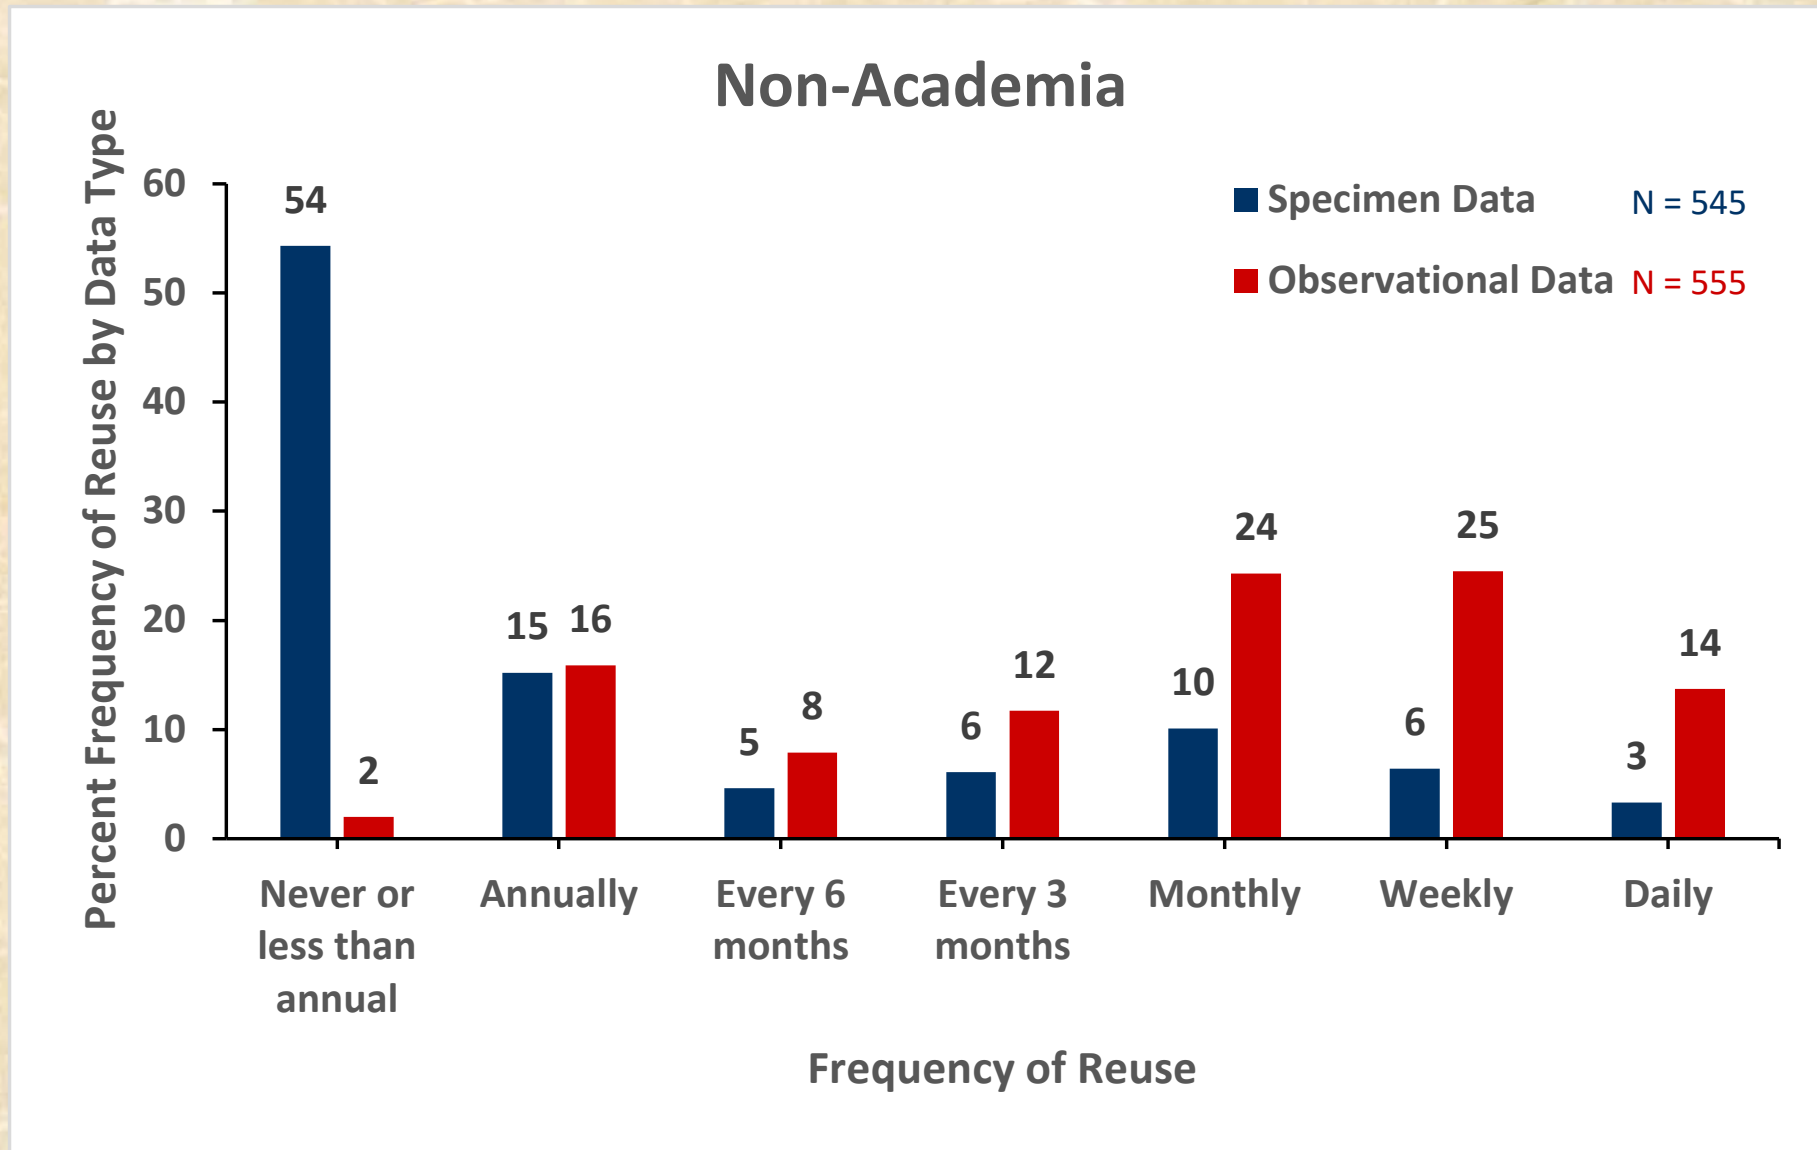

# Data Type Reuse by Academia

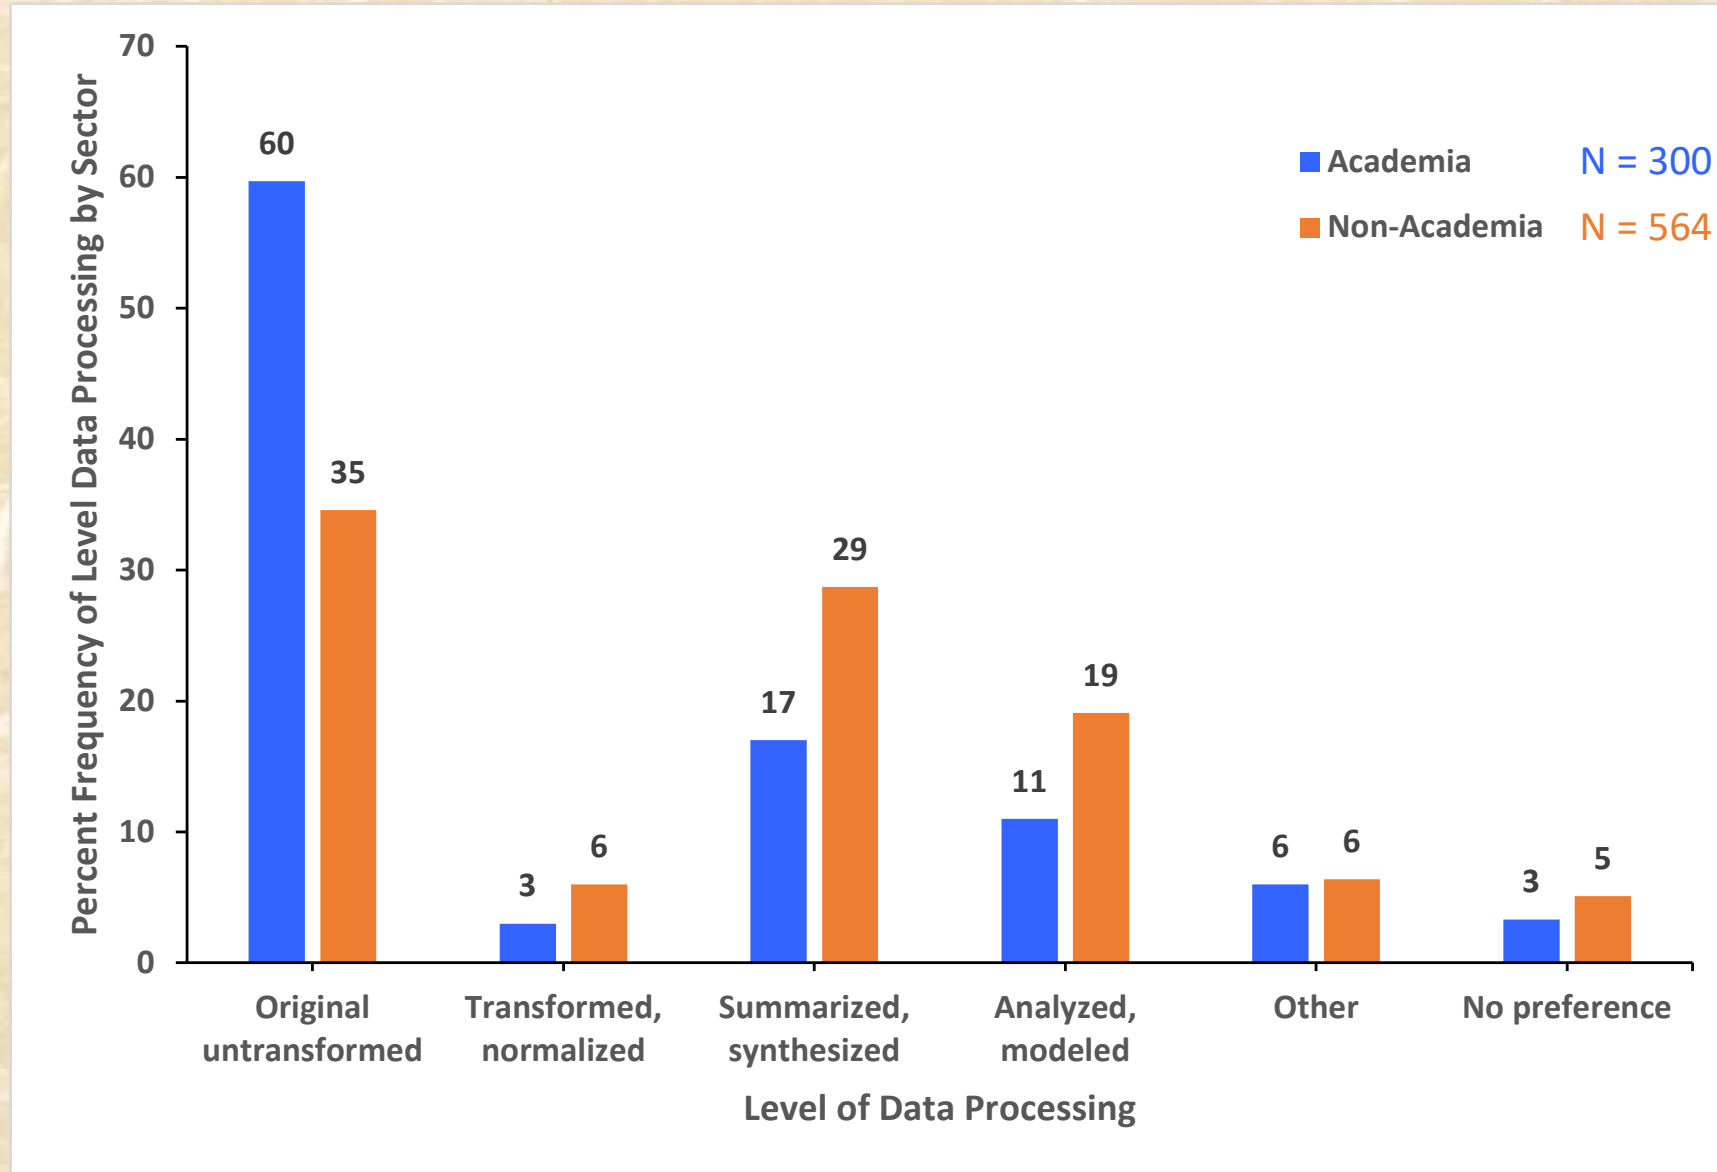

Percentages do not total 100% due to rounding

# Data Type Reuse by Non-Academia

Percentages do not total 100% due to rounding

# Level of Processing of Preferred Data for Reuse

# Frequently Used Sources of Data for Reuse

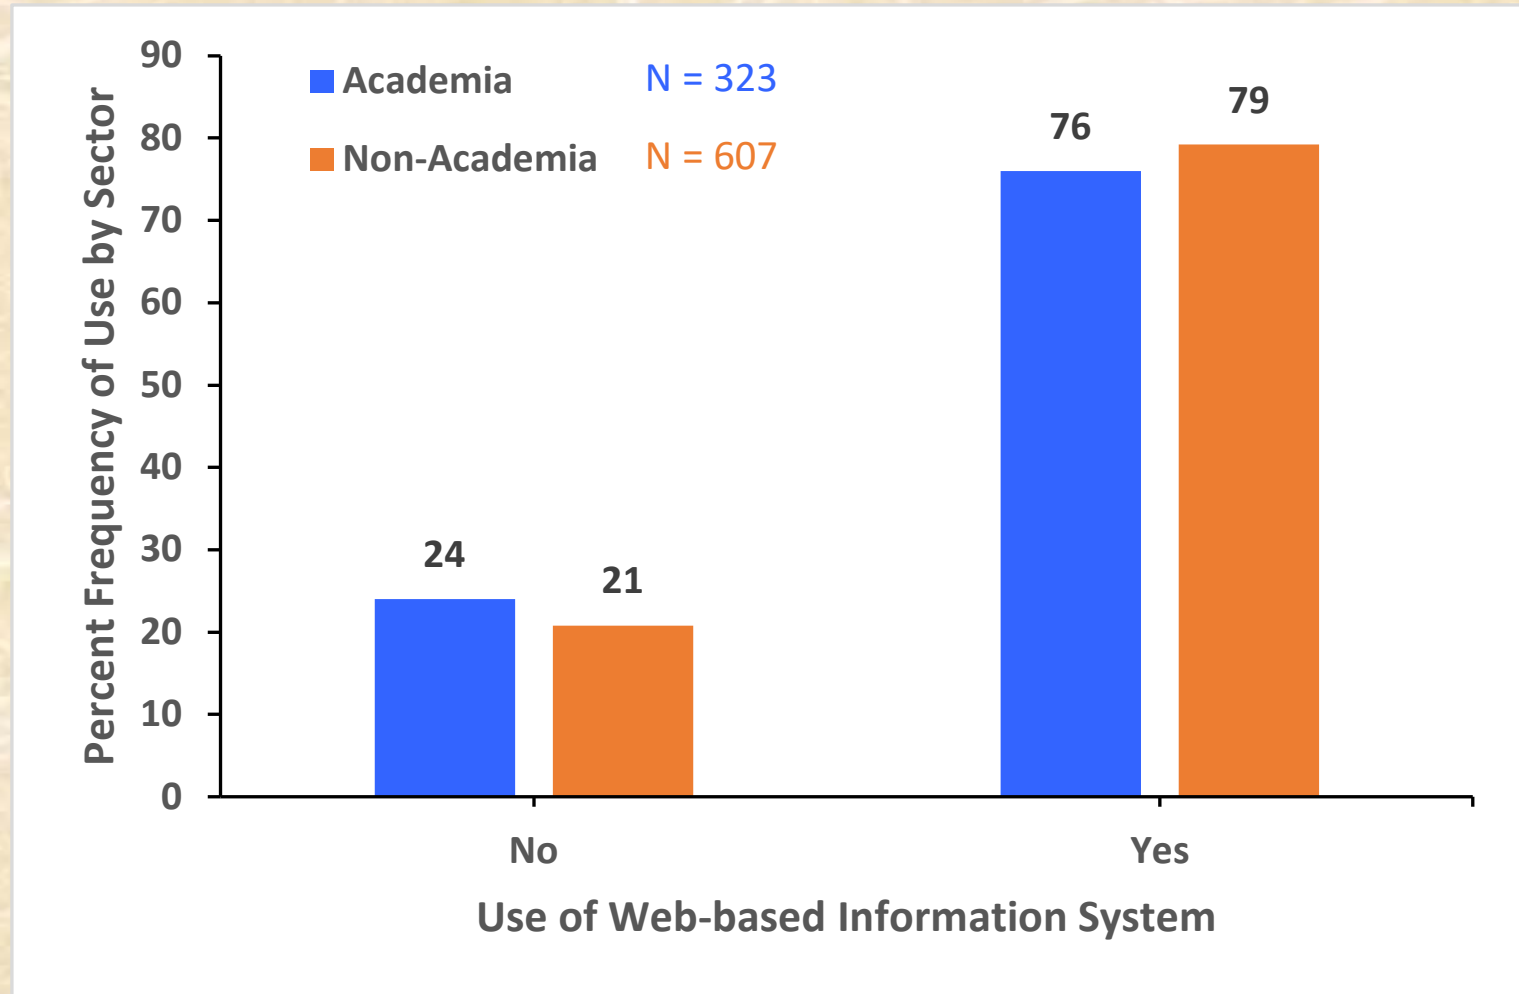

Sample size (N) per data source:

Data Source	Academia	Non-Academia
Colleagues	290	550
Reports	290	552
Books	286	540
Publications	287	544
Web	292	554

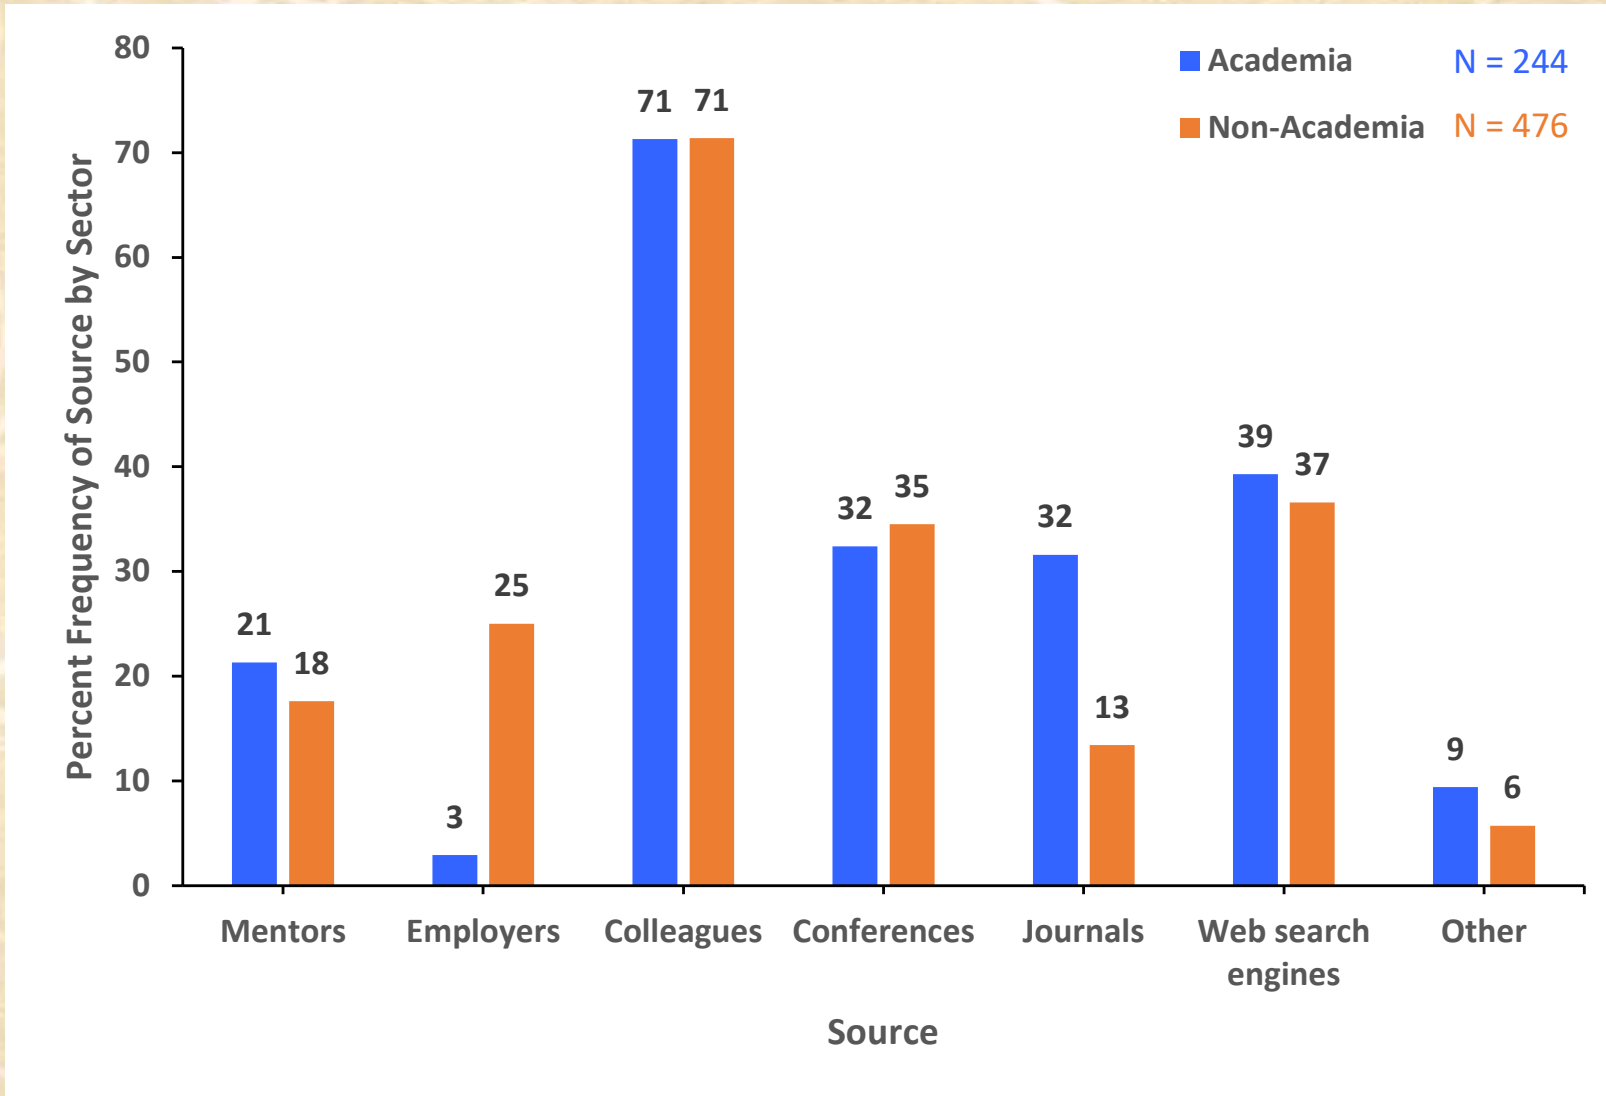

From 5 separate data source questions. Total percentages per sector are greater than 100%.

# Use of Web-based Information System in Past 12 Months

~ 80% of survey  
respondents used a  
Web-based information  
system in the last year

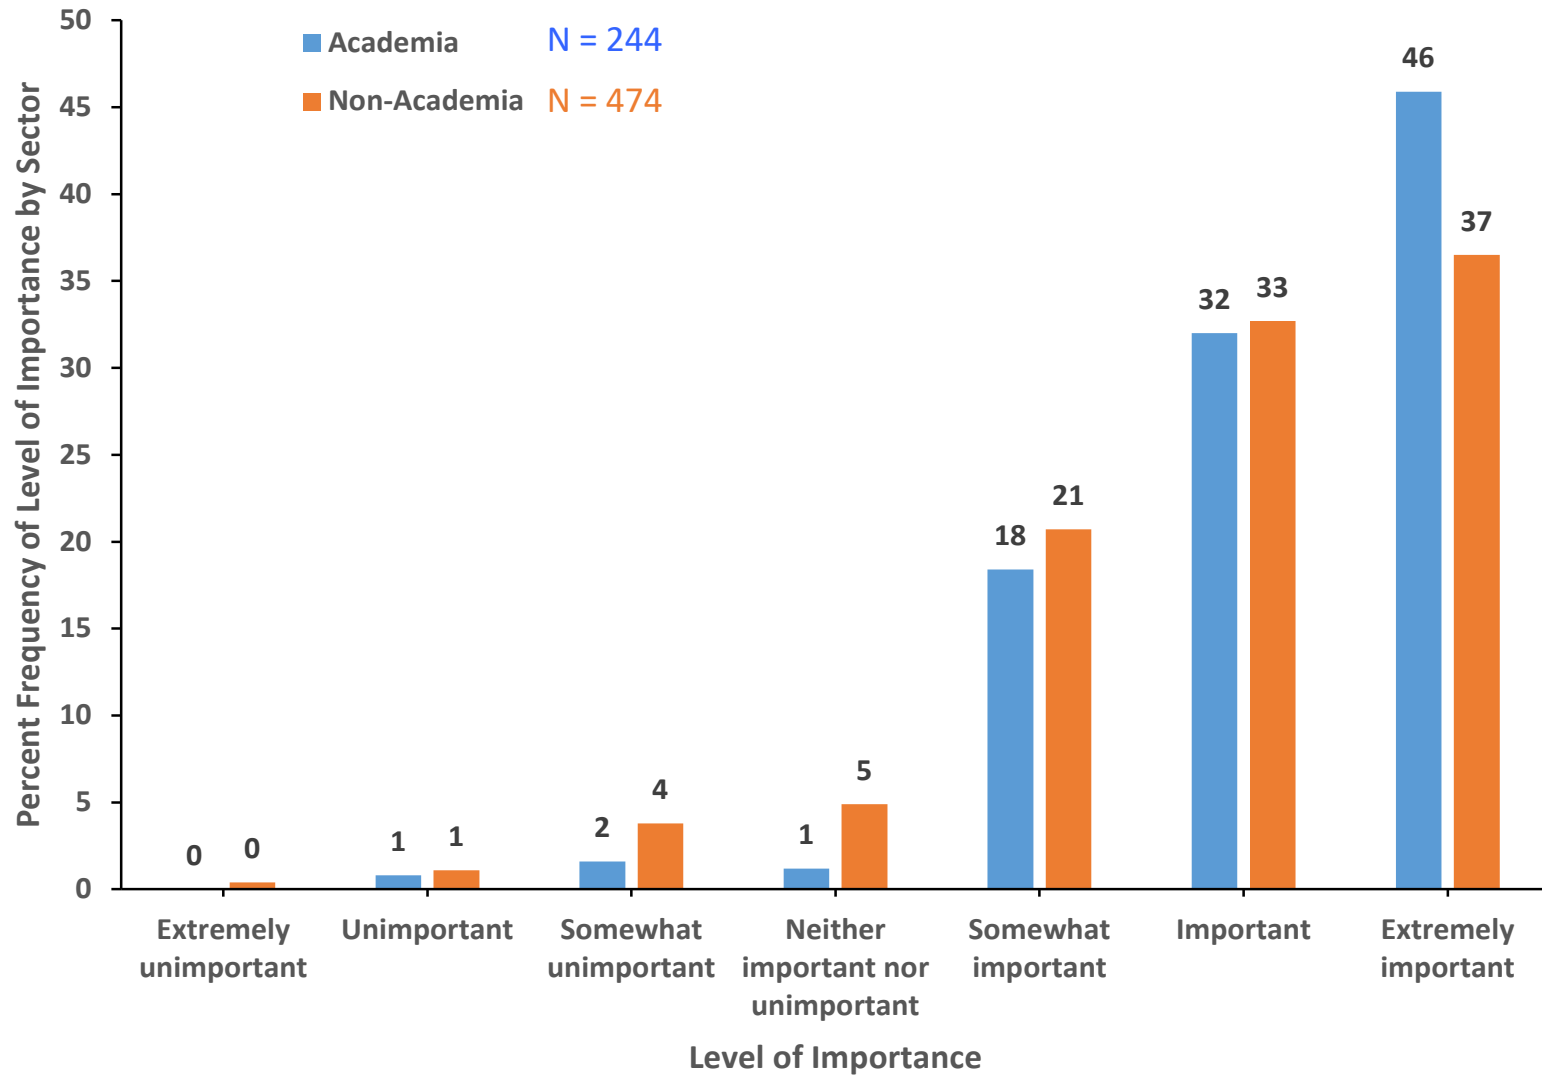

# Sources where Respondents Learned about Web-based Information Systems

From 'Select All that Apply' question. Total percentages by sector are greater than 100%.

# Importance of Availability of Web-based Information Systems

Percentages may not total 100% due to rounding

# Next Steps

- Conduct statistical analyses of closed-ended questions
- Code and analyze open-ended questions

Thank You
